

Lab Activity 19

Practice with the Comparator Interface:

Comparing Basketball teams

Compare Methods

- Fill in the **compare** methods for the **CompareByPlayoffsAndSalary** and **CompareByWinsLossesChamps** classes (*see activity Java files*).
- In the **CompareByPlayoffsAndSalary** the compare method should list:
 - (1) teams that made the playoffs last year before teams that did not.
 - (2) If this is the same then it should list teams with lower salary first.
- In the **CompareByWinsLossesChamps** list:
 - (1) teams with more wins first.
 - (2) If the same then list by teams with fewer losses.
 - (3) If this is the same, teams with the most championships should be listed first.
