

# *Lab Activity*

1-D Array

- You will be downloading `OneDArrayActivity.java`
- Work within your cohort
- Everyone must submit!
- Submit to today's Lab Activity on Collab Assignments
- **Due: Wed. Sept 9, 2020**

# 1-D Increasing Arrays

- Download the file `OneDArrayActivity.java` from Collab (resources)
- Fill in the missing code that will **determine if the array that is input is increasing**
  - That is, each value in the array is greater than the previous value (except for the first value).  
**Example:** { 2, 4, 6, 7, 21 }
- **Print** something to the console indicating if the array is increasing or not (e.g. “**This array is increasing**” OR “**This array is NOT increasing**”)
- **Submitting:** [Submit **.java** file – not **.class** file!]
  - **EACH person** must turn in their own copy of the solution on Collab!
